TRANSPLANTER SERIES TCD

The **De Cloet Transplanter TCD series** is specific for the transplant of every kind of little plant or culture rooted in peat clod with conical or pyramidal shape. It is available from 1 to six rows.

The machine is provided with universal 3 points attack and every element is moved by an independent rubber wheel.

The distribution of the plants is made by a distributor with 10 holes and the distances between the plants and between the rows are adjustable.

Accessories on request:

- Row liner
- Watering system with 300 litres tank
- Turning plates with six elements each one
- Clods divider
- Microgranulator
- Compost spreader

Vertical and orizzontal adjustment of the wheels that compress the ground.

Adjustable

13 - 50 cm.

1. Clods divider
2. Rows liner

Distributor with 10 holes
